

# Muhammad Faizan

.Net Developer

Email engineerfaizan56@gmail.com

Mobile 0318-9417122

## Summary

Results-driven .NET Developer with over 3 years of experience in developing and maintaining desktop and web applications using .NET Core, MVC, C#, and SQL Server. Specialized in creating financial systems, ERP solutions, and POS applications with clean architecture, high performance, and strong database design. Proven ability to deliver scalable, secure, and efficient software solutions that enhance business operations and user experience.

## Education

B.COM : from Sindh University Jamshoro

## Projects

**Anaj-POS:** A C# WinForms desktop application designed for inventory and sales management in the wheat industry. It provides a complete ledger system for tracking customer and supplier transactions, featuring Roman English to Urdu language support for better usability and accessibility..

**Electron-ERP (WIP):** An accounting web application built for the electronic market using .NET Core 8.0 with Clean Architecture for better scalability and maintainability.
